Hyunsu Go

Research Intern, Visual Computing Lab, Seoul National University

hsmail02@snu.ac.kr | gohyunsu.github.io | github.com/gohyunsu

RESEARCH INTERESTS

3D visual understanding for adaptive robot manipulation: deciding when to act, observe again, or revise a plan, then learning from the outcome.

EDUCATION

Seoul National University Spring 2027

Incoming integrated M.S.-Ph.D., Computer Science and Engineering

Seoul National University Feb 2027

B.S., Mechanical Engineering (expected)

RESEARCH EXPERIENCE

Visual Computing Lab Jun 2026 - Present

Research Intern, SNU Computer Science and Engineering

Supporting automated collection of visual observations and grasp outcomes for robotic-hand research.

Precision Bioinstrumentation Laboratory Jul 2024 - Present

Undergraduate Researcher, SNU Mechanical Engineering

Studied representations of full single-cell vibrational signals.

Imaging-driven Medical SuperIntelligence Group Aug 2025 - Apr 2026

Student Researcher, SNU AI Semiconductor Engineering

SELECTED PUBLICATIONS

Microfluidic vibrational transit signals encode multidimensional single-cell biophysical states

2026 | Submitted manuscript

From Complete Scanpaths to Finding-Level Gaze Targets in Chest Radiography: Structured Cues and Learned Reweighting

2026 | MedAI, accepted | Equal contribution

MAESIL: Masked Autoencoder for Enhanced Self-Supervised Medical Image Learning

2026 | ICEIC, published | doi:10.1109/ICEIC69189.2026.11386292

RECOGNITION

Presidential Science Scholarship 2023 - Present

Outstanding B.S. Thesis Presentation Award, SNU Mechanical Engineering 2026
